

19<sup>th</sup> International Conference on Advanced  
Computational Engineering and Experimenting  
29 JUNE – 3 JULY 2026 | RHODES, GREECE

## SHORT BIO:

**Alma Delhi De León** received her Bachelor's degree in Mechatronics Engineering in 2015, her Master's degree in Electrical Engineering in 2016, and her PhD in 2023 from the National Autonomous University of Mexico (UNAM). She received an honorable mention for her Master's thesis, "Optical Sensor for the Characterization of Thermal Diffusivity of Materials." She collaborated in teaching courses in the Master's program in Engineering, specializing in Instrumentation, from 2019 to 2021. She was a professor at the Faculty of Sciences at UNAM, teaching courses in the Biomedical Physics program from 2022 to 2024. Currently, she is a Researcher at the Iberoamerican University in the Institute of Applied Research and Technology (InIAT) in the Health research area and is the technical lead of the Center for Engineering and Technology of Rehabilitation (CITeR). She is a Candidate recognized by the Mexican National System of Researchers. His research area is the instrumentation of biomedical devices focused on the area of rehabilitation.
